HOW-TO GUIDE

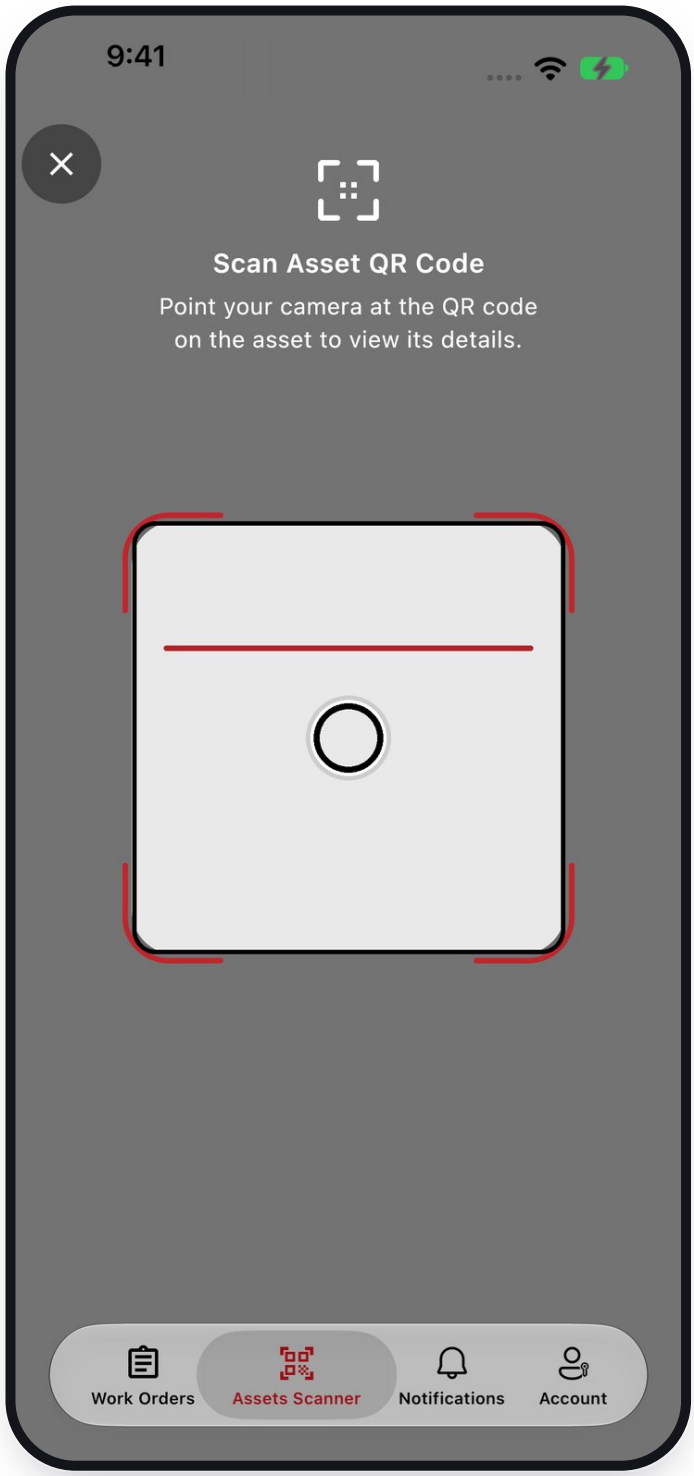

Scan an asset's QR code

Every asset in the building carries a QR code. Scan it to see what the asset is and where it belongs, without searching for it.

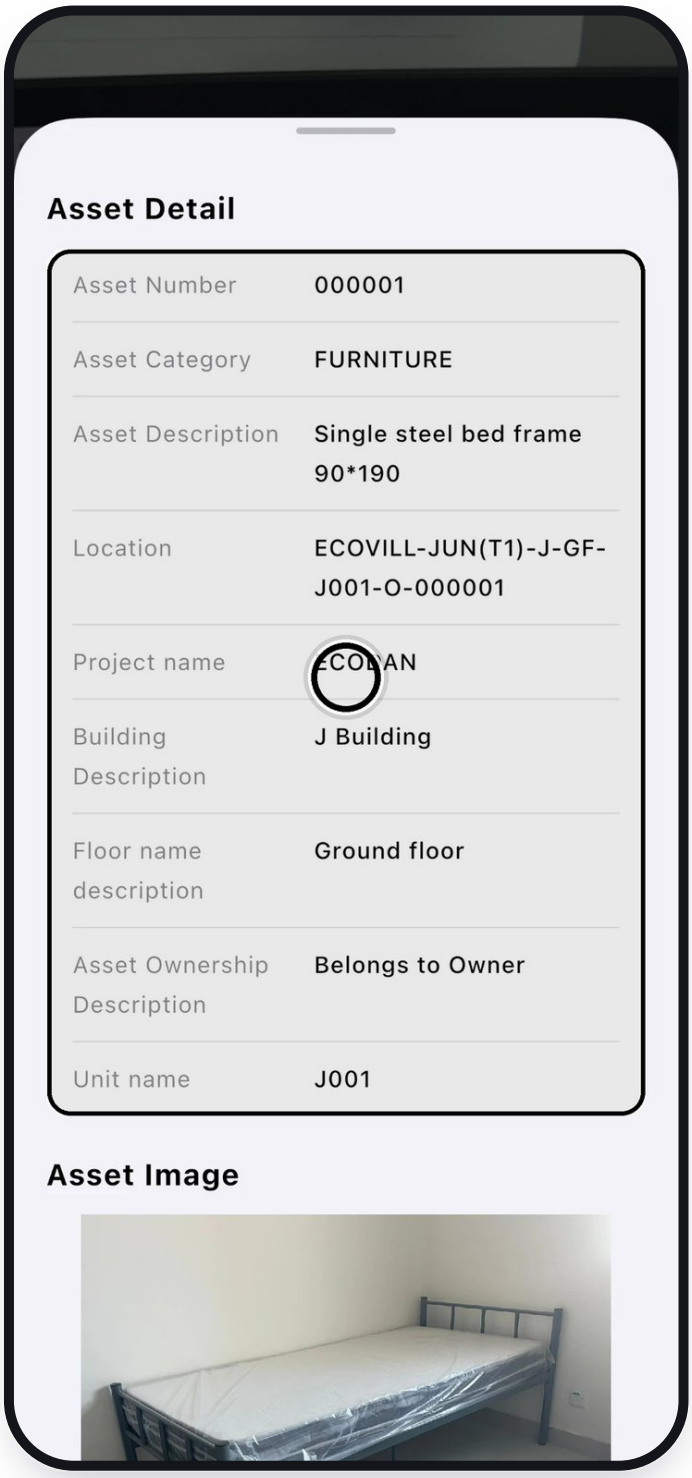

OPEN THE SCANNER

From any screen, tap Assets Scanner in the bottom bar.

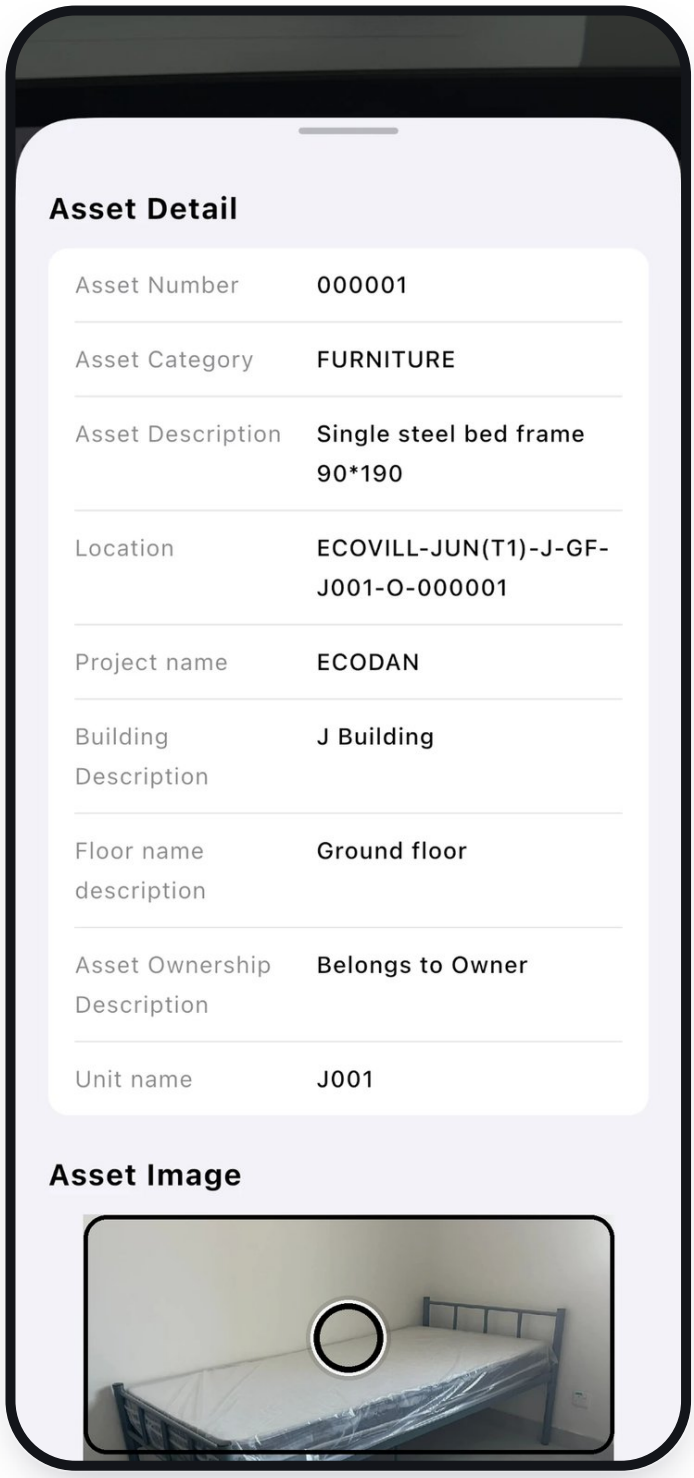

POINT & SCAN

Line up the asset's QR code inside the frame. It scans automatically.

ASSET DETAILS

The asset's details open: its number, category, description, location, building, floor and unit.

ASSET PHOTO

Scroll down to see a photo of the asset.

Asset identified

Scan any asset's code to check what it is and where it belongs.

Check the location Make sure the asset is where its record says it should be.
